With precision.
MOVING GREAT THINGS.

- ◉ Steel-/mechanical engineering & assembly
- ◉ Multi-ball bearings
- ◉ Bridge inspection equipment
- ◉ Cranes & spreaders
- ◉ Electrical engineering

DSD HILGERS Stahlbau GmbH

... everything from a single source

SCOPE OF SERVICES

Complete service for your steel construction/plant construction project in new construction or modernisation

- ◊ General layout and feasibility study
- ◊ Design up to detail engineering
- ◊ Structural analysis, overview drawings and workshop planning
- ◊ Manufacture of complex structural steel solutions
- ◊ Certified quality assurance
- ◊ Optimised installation including precise process planning
- ◊ Site handling from set-up to acceptance
- ◊ Individual service, even after project completion

KNOW-HOW

Special qualifications of our experts

- ◊ Special welding engineer (SFI/IWE)
- ◊ Welding quality test engineer (IWI-C)
- ◊ Connecting element specialist engineer (DSV)
- ◊ Coating inspector (FROSIO Level III)
- ◊ Welding specialist (SFM/IWS)
- ◊ Non-destructive testing (ZFP level 2: VT/PT/RT-FI)
- ◊ Expert for crane and hoist inspection

CERTIFIED QUALITY

DIN EN ISO 9001:2015 Quality management system

SCC:** 2011 SGU Management system

DIN EN 1090 Manufacturer certification (EXC4 EXC4)

DIN EN 1090-1 Factory production control (FPC)

DIN EN 1090-2 Welding certificate

DIN EN ISO 3834-2 Welding certification

WHG § 19 I Specialist company according to Water Resources Act

HPQ EXC3DB Manufacturer-related product qualification of Deutsche Bahn AG: Technical Terms of Supply for the construction of railway bridges and other engineering structures (Certificate in 2022)

Large dimensions.

We are experts. Our company has been a synonym for competency in the implementation of major projects in the field of steel structures, mechanical engineering and installation for 150 years.

Large dimensions are our strength. Benefit from our expertise and routine for your individual projects.

We live steel. As a company with a long tradition, we use steel as a proven material in innovative and sustainable applications, and will do so in the future.

In every detail.

From steel girders to the smallest screws. Our qualified expert staff ensure top quality in all services and products.

We speak your language. Distinct communication in all project stages ensures smooth processes and on-time completion. You are hence on the safe side and always assisted by skilled contact persons.

Detailed planning and certified quality assurance ensure perfect results at calculable cost.

Flexible & innovative.

We make it possible. Using feasibility studies, we examine the implementation of new construction or modernisation projects to elaborate the most cost-efficient and sustainable solution for you.

Leading through innovation. With new and individual ideas, we shape the future of steel structures for you together with selected partners in our three offices.

Directly on site. We have state-of-the-art equipment and set it up on your construction site. Our installation teams are supervised by competent site supervisors with strong communication skills; they will assist you as a reliable contact at any time.
